

LET US SEND YOU FREE OUR BOOK "Ironing Without Fire"

For centuries the thrifty housewives of Europe have been ironing their clothes with Ironing Machines. The American housewife has been slow to adopt the Ironing Machine because she has not known its advantages and because until recent years American made machines were not practical. It was not until we perfected the DOMESTIC and acquired the secret European process for curing and hardening the wood rolls that the Ironing Machine was made a success in this country. The American housewife will be glad to use the DOMESTIC when she knows what it will do for her. Mrs. James Benton, of East Palestine, Ohio, wrote:

"Ironing Machine received and I am delighted with it. I cannot understand why they are not used more in this country. I used them 20 years in England and understand them well and assure you yours is perfection. The Ironing Machine is really worth the money for the pleasure alone derived. I only wish I had seen your ad before."

The Domestic Ironing Machine

is 100 per cent. better than the best European Machine ever made. It runs lighter, does better work and lasts longer. It will iron cold more than three-fourths the clothes of almost every family. It does the work in less than one-quarter the time and saves all the expense for fuel, as well as the undue wear on the clothes which cannot be avoided when hot irons are used.

These claims are so broad that many people doubt them and some have to be shown before they are convinced. H. M. Messenger, of 55 Orchard Grove, Cleveland, Ohio, wrote:

"I must admit that I was most skeptical of the idea presented by your advertisements, and so had to be shown very conclusively that the work was what you claimed it would do. We are so well satisfied that we endorse most emphatically several points: First, Economy; second, Speed; third, Ease of Operation; fourth, No Heat; and fifth, All Around Efficiency."

Cold ironing is beyond question the most economical method ever devised for ironing clothes, and the DOMESTIC the most perfect and efficient machine ever made for ironing clothes cold. In the DOMESTIC pressure accomplishes what heat is used for when irons are employed—it smooths and gives the polish. But the pressure does not cause the damage to the clothes that hot irons do.

It is a well known fact that hot irons destroy clothes—you know it if you will but stop to think. Every time you iron your linens with an iron hot enough to do the work, you are mildly but certainly scorching them.

The heat weakens the threads, slowly taking the life out of the fabric. Every ironing day adds its share to the destruction. That's why table and bed linens wear out so fast in this country and because they are ironed cold is why they last for generations in Europe.

Cold ironing with the DOMESTIC keeps the clothes snowy white—they always look new. It has been demonstrated time and time again that hot irons are responsible for clothes turning yellow—it's the heat that does it and nothing else. Quit using hot irons, use the DOMESTIC IRONING MACHINE, and your linens will soon regain and always retain their spotless whiteness.

Besides the saving in linen expense, and

the saving in fuel, the DOMESTIC saves three-fourths the time and all the hard, hot work necessary when hot irons are used. C. J. Noel, of Marinette, Wis., wrote:

"The machine has proven its case and there would be rebellion in my household at the suggestion of returning it. It reduces six to eight hours of the hardest part of the ironing with a hot stove and irons, to about one hour of comparative diversion with no heat, and does very much better work, especially on linen."

We want to place a DOMESTIC IRONING MACHINE in every home in America on its merits. We propose to send any Ironing machine we make on a 30 days' free trial.

Use it a whole month in your own laundry on your own linen before you decide to keep it. When the 30 days are up—and not before—then you decide whether it has made good or not. If it has not proven every claim we make for it, you are to return it at our expense. We don't ask you to run any risk—you are not buying something in the dark—there will be no sale unless you are satisfied that the DOMESTIC is the best investment you ever made. If you cannot see how it will save its cost in one season we shall expect you to send it back. Mrs. H. K. Cass, of Cayucos, Calif., wrote:

"The Ironing Machine has arrived and I am so pleased with it that you will not get it back. I never dreamed that anything could do the work as it does, perfectly wonderful. I shall certainly do a lot of advertising for you. I am so delighted with it that I just have to tell all my friends."

You must be as well pleased as Mrs. Cass was. You will be, if you give the machine a fair test.

Lighten your labors—give your maid the help that will keep her satisfied. Your linens will last ten times as long. You will save time and keep your linens always looking new. You will save on your fuel bills. Fill out the coupon below and send to us to-day. We will send you by return mail, our free illustrated book, "IRONING WITHOUT FIRE," and give you sizes and prices of the various Ironing Machines we make, so that you can order the one that will meet your needs best.

Don't postpone, but cut out the coupon, fill it out and send it to us to-day—do it now, while you are thinking about it.
